

MEKTANI Adnane

Full-Stack & AI Developer

Tel: +212 6 45 45 93 50 | Email: adnanemektani02@gmail.com | Location: Casablanca, Morocco
LinkedIn: linkedin.com/in/adnanemektani | GitHub: github.com/adnanemektani

Full-stack developer comfortable moving across the entire stack — backend architecture, APIs, databases, and frontend interfaces — and equally at ease adapting to a client's existing codebase or a brand-new one. Recently focused on building AI-powered systems on top of that foundation: RAG pipelines, LLM agents, chatbots, and automation workflows. Hands-on experience spans MERN, Next.js, Python/Flask, and modern AI tooling (LangChain, Pinecone, Groq, Neo4j), with a habit of shipping projects end-to-end, from architecture to deployment.

KEY PROJECTS

RAG Document Intelligence Platform — Client project — E-MPGT (construction industry)

- Built V1 and V2 of a document-intelligence system extracting and querying data from PDFs, Word, Excel and images (Gemini Vision) via a conversational, ChatGPT-style interface
- Stack: LangChain, HuggingFace embeddings, FAISS → Pinecone (per-project namespaces), Groq (LLaMA 3.1), Streamlit, Gmail sync
- Added a knowledge-graph layer (Neo4j, LangChain LLMGraphTransformer, Microsoft GraphRAG) for deeper, relationship-aware retrieval

Multi-Tenant Restaurant SaaS — Menu & Order Management Platform

- Designed as a sellable SaaS for Moroccan restaurants: multi-tenant architecture with per-table QR-code ordering and real-time order tracking
- Stack: React/TypeScript, Express/TypeScript, PostgreSQL (Neon), MongoDB for activity logs, Socket.io for real-time updates, Recharts for analytics dashboards

AdnaneGPT — AI SaaS Assistant / Chatbot

- Designed and built an AI assistant product with a Next.js frontend and an n8n-based automation backend
- Used Groq for LLM inference and Supabase to persist chat history, structuring the system as a reusable chatbot architecture

PROFESSIONAL EXPERIENCE

AI & Full-Stack Developer Intern — E-MPGT

Aug 2026 – Present

Remote

- Contributing to the design and architecture of an AI-driven enterprise ecosystem focused on intelligent automation and knowledge management
- Researching and designing Knowledge Graph architectures and AI Agent systems
- Defining enterprise automation workflows and contributing to a local AI-powered ERP system
- Contributing to the E-MPGT Platform (Company & Freelancer spaces) and to Moroccan Vibrations, a next-gen e-commerce platform combining marketplace, affiliate marketing, and AI-powered business tools
- In parallel, delivered a premium multilingual (FR/EN/AR) corporate website for BATIMOB, a construction-industry client, with a strong focus on SEO and modern UI/UX

Full-Stack & AI Developer — Geeks Institute

Jan 2026 – Aug 2026 · 8 mos

Casablanca, Morocco

- Building full-stack web applications using the MERN stack (MongoDB, Express, React, Node.js)
- Integrating AI features and automation into web projects
- Applying software engineering best practices: Git workflows, clean code, agile teamwork

Project Intern — Full-Stack Developer — OCP Group

Jun 2024 – Sep 2024 · 4 mos

Direction des Embarquements, Port de Casablanca

- Designed and built a full project management platform from scratch (HTML, CSS, JS, PHP, MySQL)
- Implemented dynamic forms, dashboards, and a relational database following MVC principles
- Worked in an Agile environment with iterative deliverables and functional testing

EDUCATION

Master – Computer Engineering & Artificial Intelligence (IIIA)

2025 – 2027 (In Progress)

Faculty of Sciences Aïn Chock (FSAC), Hassan II University – Casablanca

Professional Bachelor's Degree – Full Stack Development & DevOps

2023 – 2024

Faculty of Sciences Aïn Chock (FSAC), Hassan II University – Casablanca

SKILLS

Frontend: React, Next.js, Redux, TypeScript, Tailwind CSS

Backend: Node.js, Express, NestJS, Python (Flask)

AI / LLM: LangChain, RAG, LLM Agents, Groq, HuggingFace, Prompt Engineering, Knowledge Graphs (Neo4j)

Databases: PostgreSQL, MongoDB, Pinecone, Redis

Tools & DevOps: Docker, Git/GitHub, REST APIs, MinIO, CI/CD basics

CERTIFICATIONS

- Elements of AI for Business – MinnaLearn (2026)
- Introduction to DevOps – IBM / Coursera (2026)
- Introduction to Cloud Computing – IBM / Coursera (2026)
- Introduction to Agile Development and Scrum – IBM / Coursera (2026)
